Dear Sir/Madam,

Happy New Year.

Thank you kindly for invitation to apply to the role of People Data Solutions Analyst. I hope this message reaches you well. My motivation comes directly from the experience I had 10 years ago as an intern in the UK Business Data team at Fimat/Societe Generale – a subsidiary of France's 2nd largest bank offering prime brokerage client services, where I was responsible for managing the crucial Bloomberg and Eikon macro spreadsheets which linked to AI systems such as Consensys. As the junior Data architect on the team, there were no less than 10 data systems I also co-managed – each used for post-trade execution and reference data which reflected the activities of the Account Executives and Traders on the Fimat/Societe Generale trading floor. Examples include: BTS, Kondor+ and SunGard Ubix. Daily reports were compiled for management information on a daily basis. Give ins (GIGO), SunGard GMI data management (ISO, and T+1 reporting were duties also within my remit as an intern. Furthermore, as an MSc student in HRM at the Open University, I have just sat a module in Evidence-Based Practice in People Management, which I believe is a very relevant component to this role.

Yours Sincerely,

A handwritten signature in black ink.

Alfred Anate Bodurin Mayaki (Student)
